Description

A fast-paced, buzzing environment with great diversity – a place where the **customer** is always the centre of attention. Employee are our success, and we are committed to being a good employer.

By providing a fun, creative and dynamic workplace, we all grow together.

Our working approach is shaped by a strong respect for each individual. This applies to every aspect of the employment – from wages, working hours and freedom of association, to equal opportunities for growth and development within the company. Every employee has the right to discuss work-related issues directly with management.

Our Test Accelerators

K-FAST

Automation projects at KiwiQA utilize a proprietary, home-grown framework called **K-FAST**, an acronymic for KiwiQA's Framework for Automated Software Testing. K-FAST has been time tested in many projects with excellent results and proven ease of use.

Automation Testing

K-SPARC

K-SPARC traverses through every stage of Performance Testing with a prime focus on throughput and application load. The framework begins from the study of performance requirements, running all the way to the preparation of the test execution summary report.

Load/Performance Testing

K-ASSIST

Test Strategy consultation is executed using a home-grown framework called **K-ASSIST**. We believe there is a lot of scope for the creation of value & innovation-driven solutions which will decrease cost while ensuring improvement in quality

Test Consulting and Strategy

K-RASINS

At KiwiQA, Test Engineers follow "**K-RASINS**" a proprietary methodology for designing test cases, that help achieve maximum coverage. KiwiQA follows Test Case with a set of inputs, execution preconditions, and expected outcomes developed for a particular objective, that are based on business workflows to verify compliance with a specific requirement.

Proprietary methodology for designing test cases,

Our Services

Automation Testing

Load and Performance Testing

Mobile Testing

Code Verification

Security Testing

Manual Testing

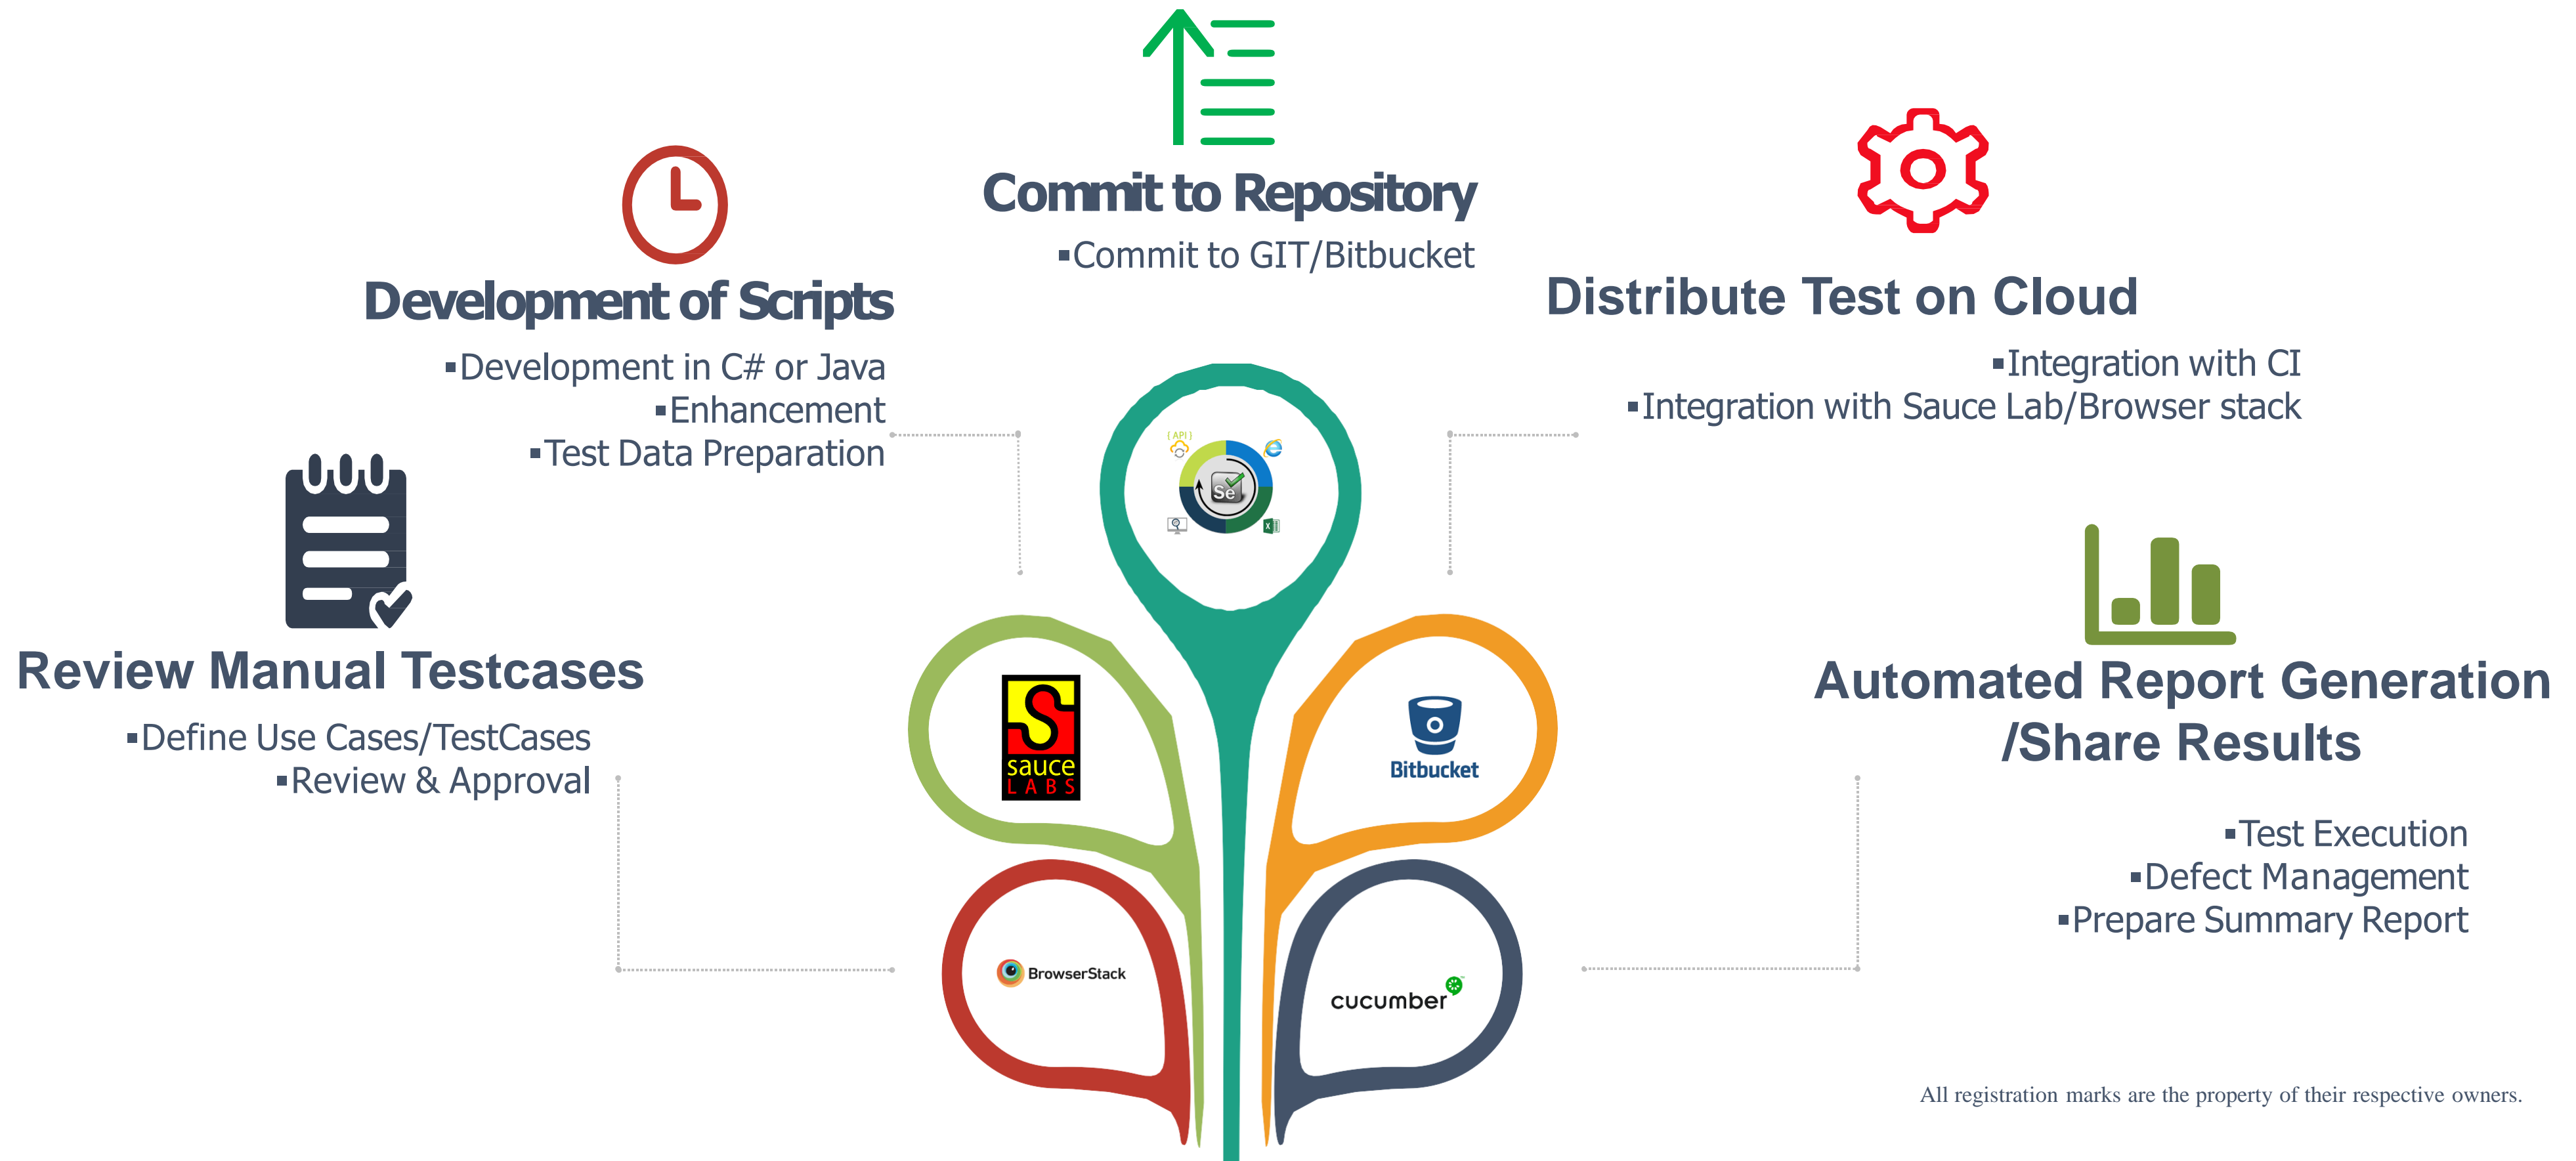

Big Data Testing

ERP & IoT Testing

Automation Testing

Mobile Testing

Define

- Test Strategy
- Device Identification
- Analyze Market Trends

Automation

- iOS Automation
- Android Automation
- Device Certification

Develop

- Develop TestCases
- Lab Set up
- End to end Testing Setup

Deliver

- Real Handsets Testing
- Pre-Market handsets Testing.

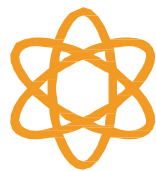

Performance Testing

Define & Design

- Define Performance Requirement
- Select Performance Testing Tools
- Procure Pre-Prod Test Environment
 - Define Test Data
 - Identify Potential Risks

Analysis & Certify

- Analysis based on performance Data
- Capacity measurement for web/DB server
- Final summary report Preparation

Develop

- Installation of tools
- Populate Test Data
- Design Test Scripts
- Dry run on Test Scripts

Test & Tune

- Execute The Scripts
- Tune Application Server
- Tune DB Server
- Tune the infrastructure

Code Testing

14

Analyze your Software Code

- Locally and on cloud
- Integrate your dev life cycle

Governs Your Application

- Take decision about your application
- Explore best repair scenarios

Know the Quality Factor

- Risk
- Metrics
- Defect.

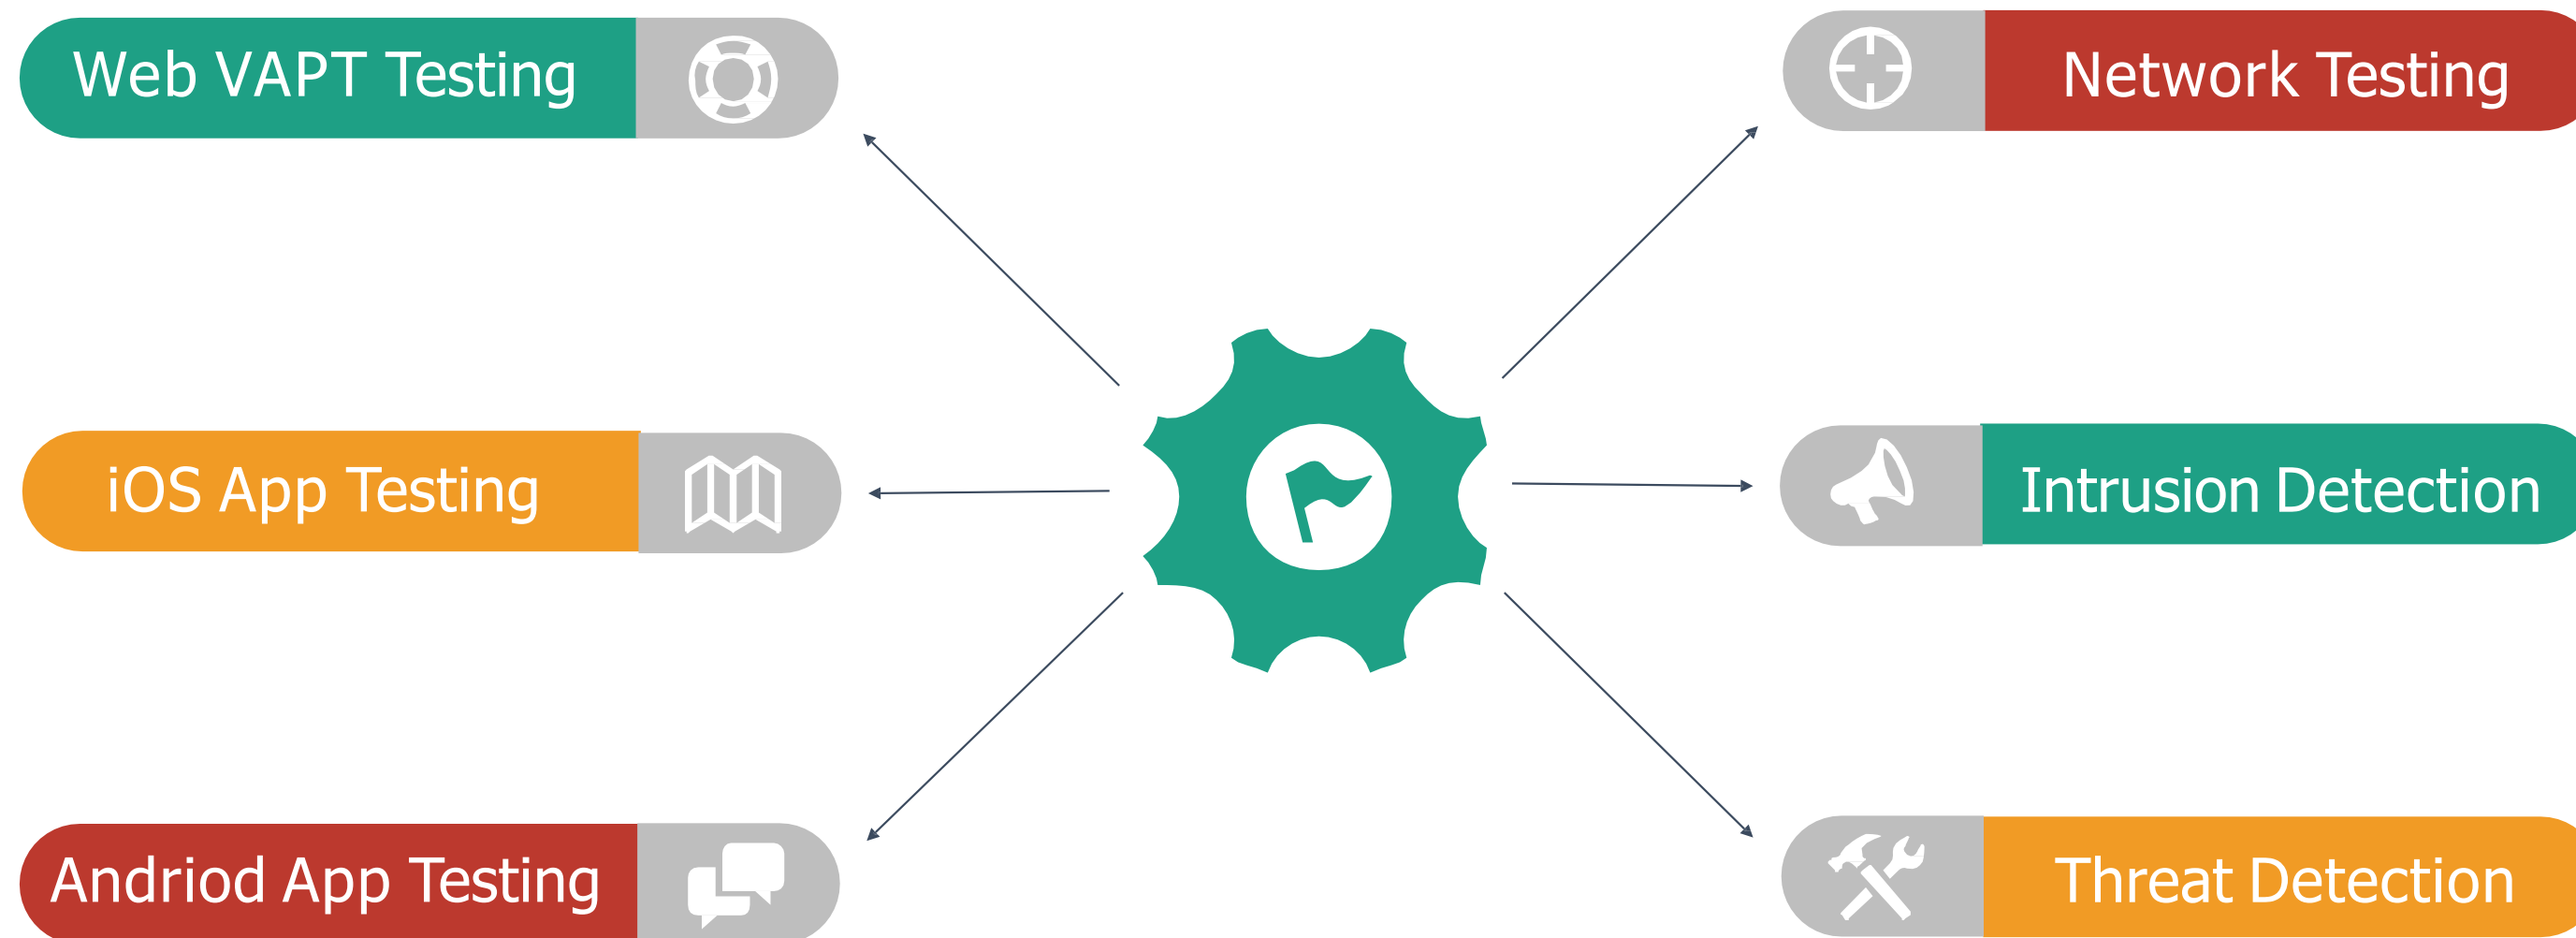

Manage Quality Model

- Define your own or use ours
- Choose Best Practice & metrics
- Define your Portfolio

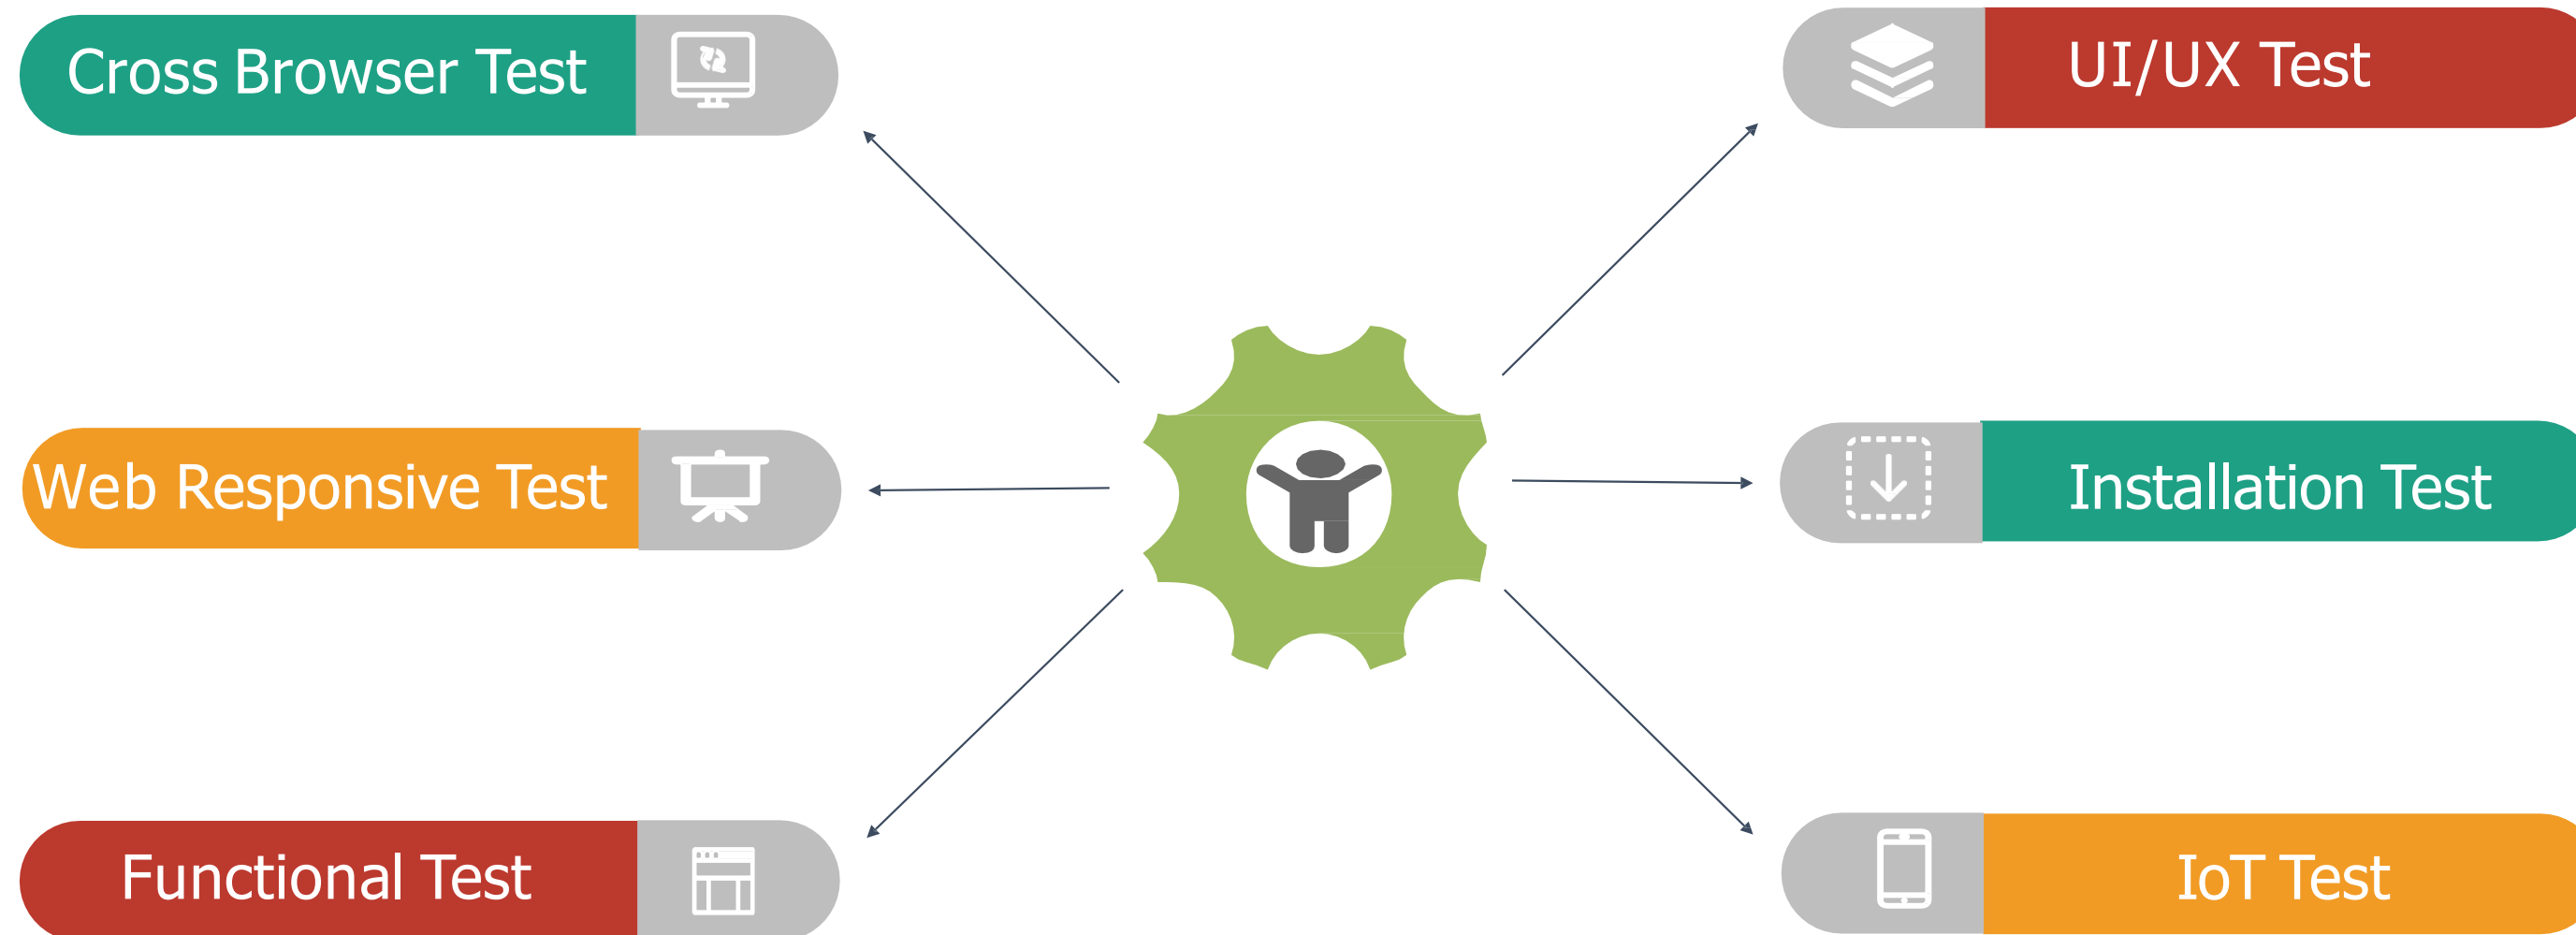

Security Testing

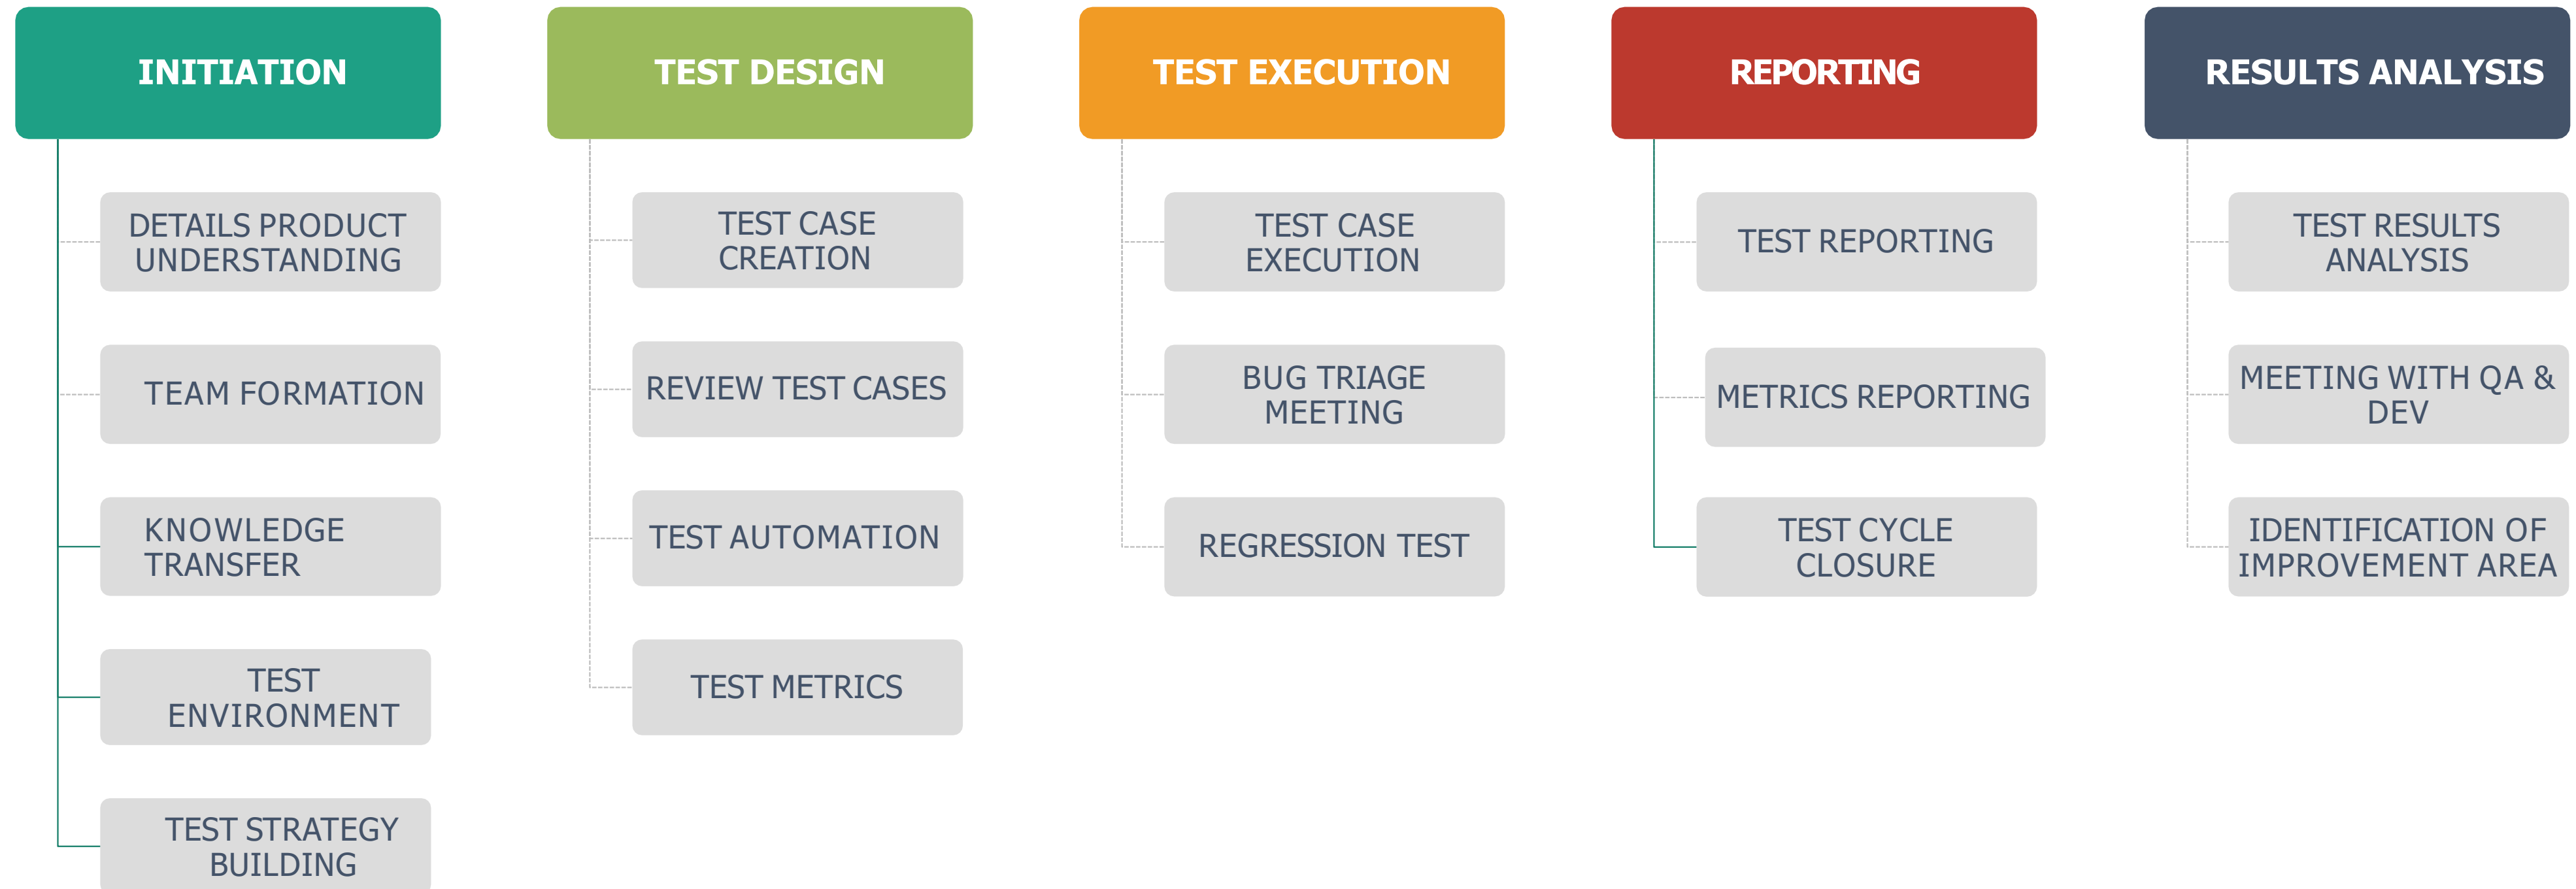

Manual Testing

Our QA Methodology
